Description

The Canterbury stacking chair is now available in 4 **100% recycled** polypropylene colours for the back rest. The elegant and **contemporary Canterbury** chair is fast becoming a leading alternative when one is demanding a quality **wire-framed** chair. If high levels of comfort with incredible stackability are a seemingly unattainable goal – look no further. The **skid-base CSPA** comes with a tough polypropylene back with curved contours both horizontally and vertically, allowing all kinds of **postures** to be accommodated, including those of **musicians, diners, worshippers, pupils** and more. It comes in several different shell colours. The frame is **chrome plated** for excellent scratch resistance. The polypropylene/padded hybrid nature of this chair provides some value from a poly chair, with the added comfort of a padded seat. A wide range of fabrics are available for this chair, to suit any list of priorities. Please call for a fabric card. Wooden or polypropylene arms are available, and do not compromise **stackability**. Customers can choose from 3 different linking devices and can specify an optional book holder, if required. 2 types of floor glide are available for floor protection. This contemporary **stacking** chair comes with a 5 year **guarantee, stacks 32 high** on half a square metre (on the optional **dolley**) and represents one of the highest **quality** items we sell. It is available for trial as a sample. Lead-time is typically 6 weeks from the date of order.
