Description

Gopak Contour 25 folding tables are:

- Strong yet light
- Versatile and easy to use
- Folds flat for storage

The popular Contour range of folding table is ideally suited for all applications. This product is light to handle (from 6.5kg to 12.35kg), simple to fold and is available in a wide choice of lengths, widths, heights and colours. The impressive load bearing capacity of 500kg makes this table an option for almost all requirements, especially for churches, village halls, schools, and community and leisure centres. The Contour range features an attractive ribbed outer extrusion. Surface abrasions that can become apparent after prolonged and heavy use are better concealed by this contoured aluminium. The corner mouldings fitted to this product add extra protection against the rigours of daily use and are finished in matt black. Delivery is normally 3-4 weeks. Click [here](#) to see a demonstrative video on how best to fold your Gopak tables. All Gopak folding tables and stacking benches are manufactured to BS EN 9001:2000 for Quality Assurance. The tables are covered by an impressive five year guarantee. Our commitment to quality is taken into account when choosing products to complement our own range of furniture. All chairs, stacking tables and desks are supplied by reputable manufacturers and have been carefully selected, to provide items that offer our customers value for money.
