100 - 199	£158
200 -	£155

Description

The elegant and contemporary Durham chair is fast becoming a leading alternative when one is demanding a quality wire-framed chair. If high levels of comfort with incredible stackability are a seemingly unattainable goal look no further. The skid-base DRB comes with beech laminate back with curved contours both horizontally and vertically, allowing all kinds of postures to be accommodated, including those of musicians, diners, worshippers, pupils and more. It can be stained to one of several darker shades if desired. The frame is chrome plated for excellent scratch resistance.

The wooden/wire frame nature of this chair provides the aesthetically pleasing look of a wooden chair with a resistant chrome finish. Beech arms are available, and do not compromise stackability. An Oak finished option for seat, back and arms is also available - please call the office to speak to a member of the sales team for pricing and samples. A plastic option is also available for a complimenting hall or overflow chair. Customers can add a very simple and inexpensive linking device and can specify book holders, if required. Floor glides are supplied as standard and are fitted with bayonets into the frame.

This contemporary stacking chair comes with a 5 year guarantee, stacks 25 high on half a square metre (on the optional dolly) and represents one of the highest quality items we sell. It is available for trial as a sample. Lead time is typically 6 weeks from the date of order.

Please note the minimum online order quantity for this product is 10. For smaller quantities please call the office to discuss delivery costs.
